Cooled H3 hygienic muffles

MULTI-FUNCTIONAL TRANSPORT AND SERVING TROLLEY

The new breakfast trolley is a mobile unit made of stainless steel. One of its special features is that it is an alternative to the tray system for serving breakfast and dinner in hospitals and in the care sector. The trolley is also ideally suited for snacks and events. Furthermore, it can be used for general catering, school catering and community catering. The Premium models are fitted with electrical sockets in order to ensure that the food remains perfectly hot until it is being served. You can, for example, plug a K-POT into a socket. In principle, the

breakfast trolley is available in 2 sizes as well as in a refrigerated or neutral version. The trolley can be moved around on plastic rollers and has four corner bumpers and two pushing handles. Due to its individual and modular design, the trolley is ideal for all kinds of use. The drawers and cupboard compartments in GN format offer sufficient storage space for trays and accessories. Hygienic working due to the stainless steel panels.

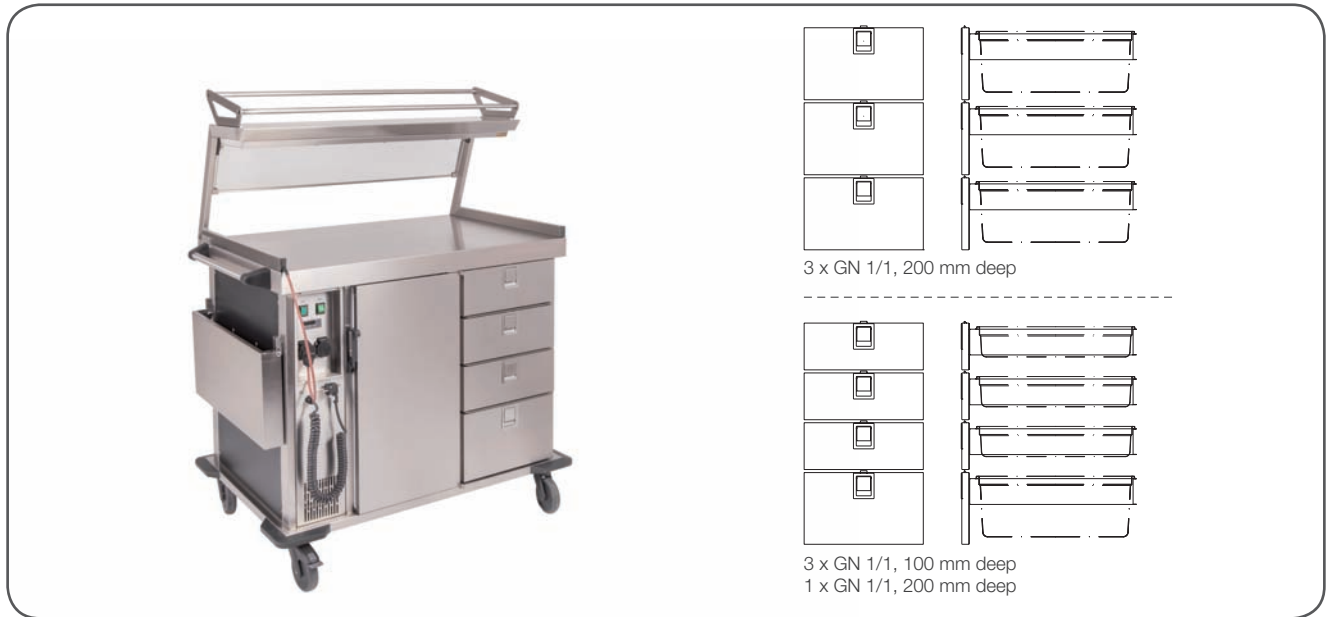

K-POT® - the mobile kitchen.
Tabletop unit for keeping food hot and cold as well as cooking and serving.

thermoplates® 4.0 made of SWISSPLY® multi-layer material - the cookware in GN format. Clear identification due to the QR code (transparency in the food flow).

MOBILE °CHECK
Measuring, capturing, evaluating and thinking for itself - for optimum food quality.

TECHNICAL DATA.
